

EXTENDED LEARNING CHOICE BOARD

LITERACY

Write an alternate ending to a movie, show or book. What would happen differently to the characters?
How can you resolve the storyline in a new and different way?

NUMERACY

Build a tower of a solid (3D) figure. Your figure must include length, width and height. Use whatever materials you can collect the most of. This should be fun!! Take a picture of your finished product and submit it to your teacher.

SCIENCE/STEM

Build an insect house. Visit the [libraryplus](https://www.libraryplus.com/) website and watch the instruction video. Think about what kind of bugs you want to attract and research what kind of habitat they might like. Check in on your insect house throughout the week to see if any bugs have moved in.

PHYSICAL ACTIVITY

Bike/Walking Adventure:

Put 3 pieces of paper in your pocket and head out on a bike ride. On paper one: write LEFT

Paper two: write FORWARD

Paper three: write RIGHT

*every time you get to an intersection/end of a street, pull one paper out and see what direction you need to go! See where you end up after 20 minutes! (don't forget to take an adult with you)
