## LITERACY

Write clear, detailed, directions on how to do something you're a pro at (ex. Making lemonade, brushing your teeth, snuggling with your cat, etc.) Don't forget to use transition words such as first, next, then, finally. Be specific. Find someone to follow those directions carefully to see if you missed any steps.

## NUMERACY

Create five multiplication or division word problems. Have someone in your house solve the problems, and check their work to see if they came up with the right answers.

## SCIENCE

Find a relaxing spot outside where you can sit in one place for 20 minutes. During that time, write down all that you observe (as a scientist) using your five senses. What do you see? What do you smell? What do you taste? What do you hear? What do you feel? Be in the moment and be detailed.

## PHYSICAL ACTIVITY

Click on the website:
