

EXTENDED LEARNING CHOICE BOARD

LITERACY

You are living real life history! Print or recreate by hand the “My 2020 COVID 19 Time Capsule” document. (See the link to the document on our website). Start working through the packet.

NUMERACY

If you have a measuring tape, calculate the perimeter of your bedroom. If you do not have a measuring tape, measure your rooms in footsteps. Next, find another room larger than your room and measure/calculate the perimeter. Finally, find a room that you think is smaller than your room and measure/calculate the perimeter. Did your estimations match your calculations?

CREATIVE

Create a travel brochure about a place you would like to visit or that you have visited already. You may do this digitally or on paper. Include drawings, captions, pictures (these could be cut out from magazines) and information. Include facts about the location and experiences along with why others should visit this spot on a vacation.

PHYSICAL ACTIVITY

Week-long Walking Challenge: Use Google Earth or Google Maps to chart a distance your family wants to walk over the course of the week. For example: Challenge your household to walk the distance from your home to a destination of your choice (eg. Scandia or Playland in Vancouver, etc.) How long would that take? How many kilometers is the trip? If you go for a 30-minute walk how many kilometers will you cover? How many family members do you have that will contribute to this? How many days will it take for you to get there? Create a chart to track the distance walked by each family member each day to track when you have reached your goal.

Get more of your family involved by challenging your extended family to add to your total numbers.
