

Step 3:

There are 9 tens blocks and Inez has placed 8.

She subtracts to find out how many are left over ($9 - 8 = 1$).

In the model:

There is $9 - 8 = 1$ left over.

6. For each question, carry out the first three steps of the long division.

a)
$$\begin{array}{r} \square \\ 6 \overline{) 91} \\ \hline \square \\ \hline \square \end{array}$$

b)
$$\begin{array}{r} \square \\ 3 \overline{) 76} \\ \hline \square \\ \hline \square \end{array}$$

c)
$$\begin{array}{r} \square \\ 2 \overline{) 41} \\ \hline \square \\ \hline \square \end{array}$$

d)
$$\begin{array}{r} \square \\ 4 \overline{) 83} \\ \hline \square \\ \hline \square \end{array}$$

e)
$$\begin{array}{r} \square \\ 3 \overline{) 85} \\ \hline \square \\ \hline \square \end{array}$$

f)
$$\begin{array}{r} \square \\ 4 \overline{) 57} \\ \hline \square \\ \hline \square \end{array}$$

g)
$$\begin{array}{r} \square \\ 8 \overline{) 93} \\ \hline \square \\ \hline \square \end{array}$$

h)
$$\begin{array}{r} \square \\ 2 \overline{) 99} \\ \hline \square \\ \hline \square \end{array}$$

i)
$$\begin{array}{r} \square \\ 3 \overline{) 71} \\ \hline \square \\ \hline \square \end{array}$$

j)
$$\begin{array}{r} \square \\ 4 \overline{) 82} \\ \hline \square \\ \hline \square \end{array}$$

Step 4: There is one tens block left over and 3 ones. So there are 13 ones left over. Inez writes the 3 beside the 1 to show this.

In the model:

There are still 13 ones to place in 4 groups.

7. Carry out the first four steps of the long division.

a)
$$\begin{array}{r} \square \\ 3 \overline{) 75} \\ \hline \square \\ \hline \square \end{array}$$

b)
$$\begin{array}{r} \square \\ 2 \overline{) 57} \\ \hline \square \\ \hline \square \end{array}$$

c)
$$\begin{array}{r} \square \\ 2 \overline{) 93} \\ \hline \square \\ \hline \square \end{array}$$

d)
$$\begin{array}{r} \square \\ 4 \overline{) 83} \\ \hline \square \\ \hline \square \end{array}$$

e)
$$\begin{array}{r} \square \\ 6 \overline{) 81} \\ \hline \square \\ \hline \square \end{array}$$

f)
$$\begin{array}{r} \square \\ 4 \overline{) 63} \\ \hline \square \\ \hline \square \end{array}$$

g)
$$\begin{array}{r} \square \\ 2 \overline{) 35} \\ \hline \square \\ \hline \square \end{array}$$

h)
$$\begin{array}{r} \square \\ 7 \overline{) 88} \\ \hline \square \\ \hline \square \end{array}$$

i)
$$\begin{array}{r} \square \\ 8 \overline{) 91} \\ \hline \square \\ \hline \square \end{array}$$

j)
$$\begin{array}{r} \square \\ 9 \overline{) 93} \\ \hline \square \\ \hline \square \end{array}$$
