

1. Write a division statement for each question (use "R" for remainder).

a) 

b) 

c) 

2. In each question below there are fewer tens than the number of groups. Write a 0 in the tens position and then perform the division (as if the tens had been regrouped as ones).

a)

0	5
2	7
<hr/>	
2	5
<hr/>	
	2

5 ones can be placed in each group.
25 ones have been placed.
2 ones are left over.

b)

3	1
<hr/>	
<hr/>	

c)

3	3
<hr/>	
<hr/>	

d)

5	2
<hr/>	
<hr/>	

3. Estimate each quotient by first rounding each number to the nearest ten. Then find the actual answer by long division.

a) $87 \div 9$

b) $78 \div 8$

c) $91 \div 8$

d) $126 \div 9$

4. When you divide a number by 1, what is the result? Explain.

In Questions 5 to 8, you will have to interpret what the remainder means.

5. A canoe can hold 3 kids.
How many canoes will 44 kids need?

6. Anne reads 5 pages before bed every night.
She has 63 pages left to read in her book.
How many nights will it take her to finish her book?

7. Ed wants to give 65 hockey cards to 4 friends.
How many cards will each friend get?

8. Daniel wants to put 97 hockey cards into a scrap book.
A page can hold 9 cards.
How many pages will he need?
