

3. Fill in the chart. Use a question mark to show what you don't know. Then write a multiplication or division statement in the right hand column.

	Total Number of things	Number of sets	Number in each set	Multiplication or division statement
a) 20 people 4 vans	20	4	?	$20 \div 4 = 5$ How many people in each van? <div style="text-align: right;"><u>5</u></div>
b) 3 marbles in each jar 6 jars				How many marbles? <div style="text-align: right;">_____</div>
c) 15 flowers 5 pots				How many flowers in each pot? <div style="text-align: right;">_____</div>
d) 4 chairs at each table 2 tables				How many chairs? <div style="text-align: right;">_____</div>
e) 18 pillows 6 beds				How many pillows on each bed? <div style="text-align: right;">_____</div>
f) 18 houses 9 houses on each block				How many blocks? <div style="text-align: right;">_____</div>

4. The fact family for the multiplication statement $3 \times 5 = 15$ is: $5 \times 3 = 15$; $15 \div 3 = 5$ and $15 \div 5 = 3$. Write the fact family of equations for the following statements.

a) $5 \times 2 = 10$

b) $4 \times 3 = 12$

c) $8 \times 4 = 32$

d) $9 \times 3 = 27$
