

6. Fill in the chart. Use a question mark to show what you don't know. Then write a multiplication or division statement in the right hand column.

	Total Number of things	Number of sets	Number in each set	Multiplication or division statement
a) 8 chairs at each table 3 tables	?	3	8	$3 \times 8 = 24$ How many chairs? <div style="text-align: right;"><u>24</u></div>
b) 9 marbles in each jar 5 jars				How many marbles? <div style="text-align: right;"><u> </u></div>
c) 35 flowers 7 pots				How many flowers in each pot? <div style="text-align: right;"><u> </u></div>
d) 32 people 4 boats				How many people in each boat? <div style="text-align: right;"><u> </u></div>
e) 24 flowers 6 plants				How many flowers on each plant? <div style="text-align: right;"><u> </u></div>
f) 36 candles 6 candles in each packet				How many packets? <div style="text-align: right;"><u> </u></div>

7. The fact family for the multiplication statement $3 \times 5 = 15$ is: $5 \times 3 = 15$; $15 \div 3 = 5$ and $15 \div 5 = 3$. Write the fact family of equations for the following statements:

a) $4 \times 2 = 8$

b) $6 \times 3 = 18$

c) $7 \times 8 = 56$

d) $9 \times 4 = 36$
