

You can solve the division problem $12 \div 4 = ?$ by skip counting on the number line:

The number line shows that it takes 3 skips of size 4 to get 12:

$4 + 4 + 4 = 12$ so ... $12 \div 4 = 3$

3. Draw arrows to show how you can divide by skip counting:

4. What division statement does the picture represent?

5. You can also find the answer to a division question by skip counting on your fingers.

For instance, to find $40 \div 8$, count by 8s until you reach 40.

The number of fingers you have up when you say "40" is the answer:

8

16

24

32

40

So $40 \div 8 = 5$

Find the answers by skip counting on your fingers:

- a) $18 \div 6 = \underline{\quad}$ b) $12 \div 6 = \underline{\quad}$ c) $32 \div 8 = \underline{\quad}$ d) $21 \div 7 = \underline{\quad}$ e) $45 \div 5 = \underline{\quad}$
 f) $25 \div 5 = \underline{\quad}$ g) $36 \div 4 = \underline{\quad}$ h) $35 \div 5 = \underline{\quad}$ i) $27 \div 3 = \underline{\quad}$ j) $16 \div 2 = \underline{\quad}$
 k) $36 \div 9 = \underline{\quad}$ l) $35 \div 7 = \underline{\quad}$ m) $12 \div 3 = \underline{\quad}$ n) $18 \div 3 = \underline{\quad}$ o) $24 \div 6 = \underline{\quad}$

6. 8 friends split the cafeteria bill of \$32.
How much does each friend have to pay?

7. 35 candles are in 5 rows.
How many candles are in each row?
